

New Brochure Describes Nuclear-Qualified Instrumentation

A new eight-page color brochure, describing the company's line of nuclear-qualified instrumentation, is now available from Weed Instrument of Round Rock, Texas.

“Excellence in Solutions – Products – Service” describes various nuclear-qualified products, including temperature sensors, temperature transmitters, thermowells, pressure transmitters, and analog fiber optic data links/contact closures. The publication is also available in French and Chinese.

The catalog products represent over 30 years of experience in nuclear-qualified instrumentation. Today, the Weed Nuclear Engineering team can assist with issues related to obsolescence and/or plant life extension.

For more information or a copy of the new brochure, contact Dave Robertson, Weed Instrument, 707 Jeffrey Way, Round Rock, Texas 78664. Phone 512.434.2950; Fax 512.434-2951.
